

Smart Technology at Friendship Village with FVKLiNKED!

Smart technology is now a part of every independent living residence at Friendship Village with our exclusive FVKLiNKED.

FVKLiNKED is an interactive, voice-activated, web-based system that gives you faster, easier access to community information and assistance right when you need it, using a Village-provided Amazon Echo or the FVKLiNKED app on your personal smart phone or tablet.

Smart Technology, Big Benefits

Convenience

Knowing how to plan your day has never been easier! With FVKLiNKED and your Amazon Echo, you'll have instant access to community announcements, the calendar of daily events, and dining menus—plus, connection to the front desk and other key departments—just by using your voice.

Safety

FVKLiNKED is directly connected to the security team of Friendship Village. If at any time, day or night, you need assistance, simply call out to the Echo to alert security, and help will arrive.

Comfort

With a simple voice command, the Echo can play your favorite music, tell you the news or weather, read from a book, or turn your lights on or off with a smart light switch.

FVKLiNKED smart technology is just another example of Friendship Village's commitment to delivering an extraordinary independent living experience.
